

# Installing Yuja Video Capture on Mac

By Jennifer Akpoyibo

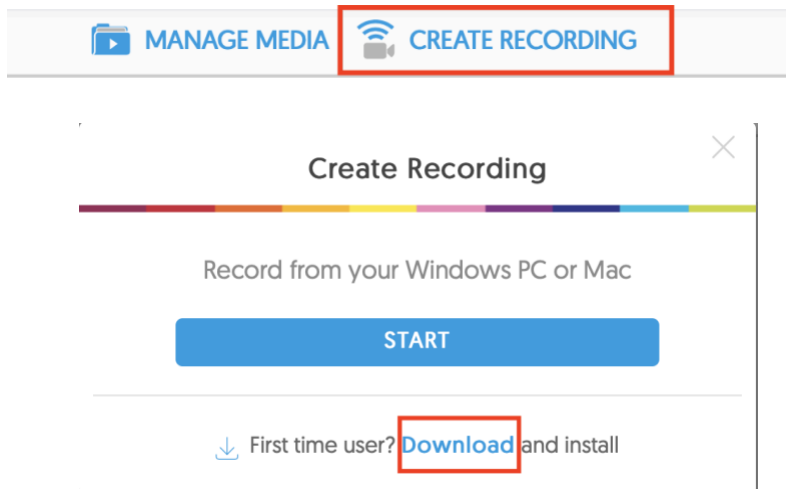

Video Link:

No software installation is required if you are viewing a video. However, if you wish to create a recording, you will need to download and install **Yuja Video Capture Software**.

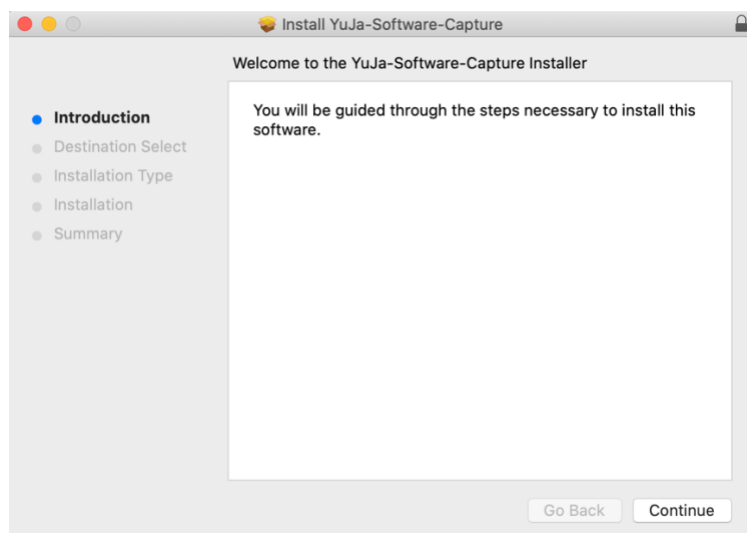

Click [here](#) to see requirements and recommendations.

## Option 1: Using a personal computer

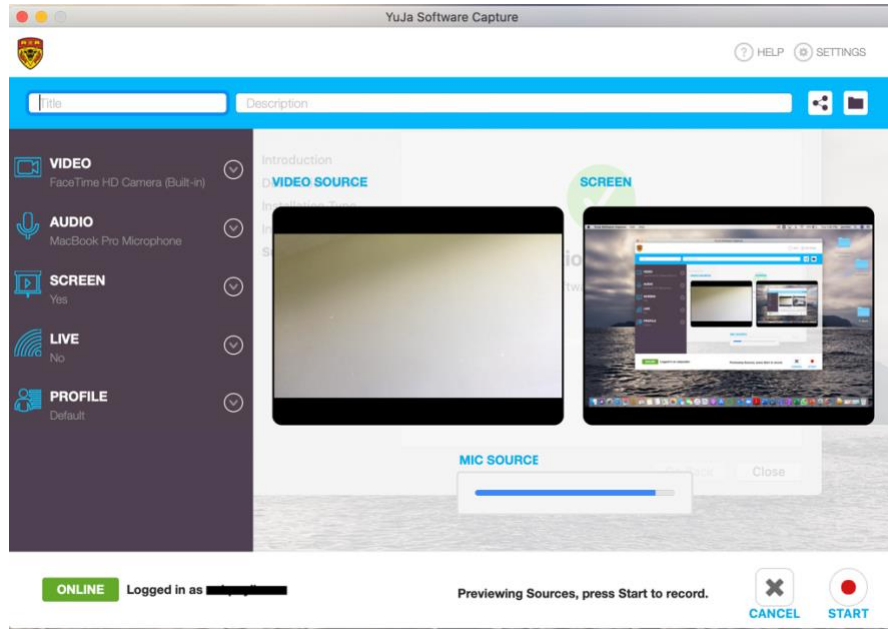

1. If you are using a personal computer, or have administrative rights on your Mac, simply log into Yuja using either of the instructions [here](#).
2. Click on **Create Recording** and then click on **Download**.

3. Click on the downloaded file and follow on the installation wizard.

4. After successful installation, the **YuJa Software Capture** window will open up.

5. To access the YuJa Software Capture application later on, follow **step 2** above but instead of clicking on Download, click on **Start**.  
A second option will be to look for the YuJa icon on the top of your desktop home page, click on it and then click on **On-Demand Session**
