Online Test Preparation: Tips for Students

Explore resources offered by the **Student Success Centre**, eg **Study Skills**, **Time Management** & **Academic Integrity**

Ensure you have a stable internet connection and perform system checks before the test, eg see **D2L System Requirements**

Use a computer instead of a mobile device to ensure you have a more reliable and efficient test experience

Avoid opening the quiz in multiple browsers/ tabs/ devices simultaneously to prevent work from being overwritten inadvertently

Should you encounter a technical issue, switch to a backup device/ connection, if available. Capture details/ screenshots of any errors encountered and notify both your instructor and technical support (**UService IT**).
